

business software for printing companies

White Papers

Overview Comfort

Good results begin with a flawless business organisation. This requires an efficient software program: **MultiPress from Dataline Solutions.**

CRM, calculation, order management, planning, time recording, invoicing and financial follow-up ... You simply select the module(s) you need, in line with your activities (such as offset printing, prepress, JDF, web, expedition, foil printing and screen printing). Discover how this market leader in the Benelux graphic sector excels in competitive software that does exactly what it is supposed to do ...

8 facts about MultiPress!

1. MultiPress is the standard in the graphic sector
2. 70% of all printing companies with an MIS/ERP system use MultiPress
3. Over 1.500 active users a day
4. MultiPress can be used both with Apple and with Windows
5. Customised modulation: budget- and user-friendly
6. MultiPress is financially feasible for any printing company employing 1 to 200 people
7. MultiPress ensures a better work-life balance
8. Guaranteed ROI within 10 months

5 misconceptions

Misconception 1: MultiPress is only useful for large companies

Fact: MultiPress is modular and highly flexible. You can start small, and MultiPress will grow with your company's needs in line with your desires and budget.

Misconception 2: it takes a lot of time to implement MultiPress.

Fact: Thanks to our many years of experience with companies of all sizes and in your industry, we can ensure that the software is implemented quickly and produces results swiftly, usually in less than one month.

Misconception 3: MultiPress is expensive.

Fact: Incorrect! You only pay for the modules you need and the MultiPress projects are usually recouped within a few months. You purchase the right to use the software and, if required, we will spread this investment so that it is feasible for you.

Misconception 4: MultiPress is complicated.

Fact: A TV remote control also seems complicated at first sight, but after a while you get the hang of it! With MultiPress you continue to discover new possibilities that will only increase your job satisfaction.

Misconception 5: A reasonable ROI is improbable.

Fact: Companies of your size, with the same basic requirements, state that MultiPress pays for itself within a few months. You only pay for the functionality which you need and use. MultiPress solutions streamline and speed up business processes, making a fast ROI possible. You can further expand the solution in case your needs change.

CALCULATE YOUR ADMINISTRATIVE COSTS IN 5 MINUTES

No business decision is made without a thorough examination of the Return On Investment (ROI). Especially in the graphic sector, where tight deadlines and slim margins are the rule rather than the exception.

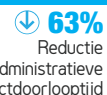

Dataline Solutions gives you a helping hand in this specific decision making process. Our robust¹ ROI calculator² is based on the **surprising results** and **important benchmarks** of a **study of the graphic industry** conducted by independent consultancy agency **WES** research & strategy with information provided by **Febelgra and Grafoe**. This brand-new application – developed in collaboration with Marc Mombaerts – clearly shows what savings and/or extra revenues you can expect after the implementation of MultiPress.

So calculate yourself **how much time and money you can save every month** thanks to our efficient MultiPress Business Software adapted to the graphic sector instead of by using different isolated solutions. The question **'Why business software?'** is probably not relevant anymore. The question should be 'When business software?'

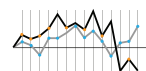

¹ Robust: Powerful, vigorous, sturdy, stoutly built, strong, reliable, solid ...

² ROI: Return On Investment

ROI ANALYSE FOR YOUR PRINTING BUSINESS

75% Maximale tijdsbesparing  **63%** Reductie administratieve projectdoorlooptijd 

 **13,46%** Mogelijke omzetstijging/jaar 

 **51€** Administratieve kostverlaging per order 

45% Meer orders via automatisering  

 **24%** Verlaging van foutenlast door automatische doorstroming gegevens 

Verlaging van niet gefactureerde aankopen, diensten, producten  **83%**

 **93,88%** 
Administratieve capaciteitsbezetting met huidige werkwijze

MultiPress Business Software applies to every administrative aspect of your business. Quotations and (post-) calculation, invoicing, order management, time registration, purchasing, planning, JDF/JMF, e-business and many other business processes are just a few clicks away. You supply the creativity and we'll do the rest!

Arti

Market leaders in a certain segment always find each other. They have a common vision and the big picture is absolutely clear to them: no waste of time and the business processes need to run flawless. This makes proper sense to a company that offers offset, screen printing, large format and digital print, along with design services and more ... When Arti, the largest printing company of Martinique, was looking for a solution in administrative automation: CRM, time gain, tight structure, transparent planning, comprehensible stock management, calculation, thorough reporting - they quickly found their equivalent in MultiPress.

Dupligratic

Die Keure Printing & Publishing is an international printing company with 180 enthusiastic employees who commit themselves to deliver high-quality print jobs on a daily basis. Die Keure specialises in offset, digital, screen printing and finishing operations, but they are also known for their high-quality art books. Until 2014, Die Keure used a variety of platforms, but this became far too inefficient and led to a great waste of time. So they started looking for an all-in-one package, and found the perfect solution in MultiPress Business Software.

Reactor

Reactor, a self proclaimed "small company" in the heart of Budapest, takes care of the prints for 1000 customers annually. 70% of the turnover comes from 40 companies, which implicates lots of small jobs. For the administration of all this, Reactor used Word and Excel. Something that didn't really go well with their ambitious vision. MultiPress is not only the better, but just the best solutions for their growing pains.

Prodigitalk

In sunny Spain, Prodigitalk is the market leader for 'variable data printing'-solutions and proud supplier of many big customers like the city of Barcelona, Aegon, Redixis Gas, gasNatural Fenosa, Seat, ... and many more. Due to the rapid growth, the back office tools weren't sufficient enough anymore to fulfill the needs of calculation, planning en follow-up. MultiPress took the plane the Spain. And succeeded in the land of bull fighters and flamenco dancers.

Imprivic

If a large format/sign printing business like Spain-based Imprivic is looking for adequate administrative software, the options are limited. Luckily there is MultiPress, offering all appropriate and necessary possibilities for that specific industry. The modular business software produces realistic numbers, resulting in clear costs and margins. This way, Imprivic from Alicante can focus entirely on their search for creative ideas for their customers.

LCapitan

Sheet offset printing businesses Lannoo Print and Captains of Printing have joined forces as L.Capitan. "The new name symbolises our partnership. A captain has the know-how and experience to move his ship into the right direction," says CEO Piet Germonprez. One thing they are 100% certain of is the administrative synergy. Both companies have been working with MultiPress - the figurehead of graphic business software - for years!
